

Project: *Treasure Map*

Creating a Old Document:

Basic Idea of the Project:

A treasure map is needed for a play. The map is described as old and tattered. You must make a prop to fill this need by creating the map using the computer, printing it and aging it.

Samples will be created to insure a quality result with the actual item.

Steps in creating the document:

- 1) Design/find your treasure map based on research using the computer.
- 2) Print your map on a piece of parchment paper.
- 3) Using extra parchment, practice tearing, crumpling, staining and burning the paper to achieve the desired effects. You will want to use some of each effect. Practicing will tell you how much of each is an appropriate amount.
- 4) Apply the techniques you practiced to the actual map.
